***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

The primary reason for this allowance is its calculation of an adjusted market share, wherein the share is determined by multiple factors which creates pull factors based in part on schedule and non-schedule factors.

Vance calculates the overall percentage of goal share achieved for a carrier overall, overall usage for a given city pair, overall air cost for a given city pair, and average leg fare cost for a given city pair, but does not incorporate these non-schedule based factors to make its corporate pre and post-travel decision making.

Walker analyzes city pair scheduling (1) the total number of actual flights for the specified route on the specified day; (2) historical demand and pricing data from past flights for the specified route during the relevant time period; and (3) current pricing information, but again does not use the non-schedule based factors to determine a market share.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
